A vast set of potential career paths in science, education and tech exist today. This presents many challenges to aspiring candidates who wish to seek out the optimal career path. Many possibilities are not accounted for, because of the lack of organized and structured information sources.

We, at Vector, look to bridge this gap by providing a concrete platform for career advice and guidance, helping our students find the right career path for themselves.

You may wonder how we are so confident, as compared to other career counselling institutes, to provide the guidance required to achieve their dream positions?

Our exclusivity revolves around our mentors and faculty, who have secured admissions and job offers from top-tier universities and multi-national tech companies. We did it ourselves, and so we are confident in our ability to help others through the same process.

We, at Vector, joined hands with a vision to guide every aspiring individual in pursuit of their dream careers, be it at home or abroad.

### Our exclusive methodical Career Counselling Services include:

- Direct Guidance from a Global Network of Experts with excellent blend of Industrial and Academic experience.
- Tailor-made Counselling by PhDs from top-tier Indian & US Institutions.
- Personalized recommendations from eminent Scientists and Engineers.
- Supervision by Mentors with hands-on teaching experience in major Institutes across USA.
